We...Creating

With its solid technological prowess, Lotte Engineering & Machinery aims to provide people with the everyday, technological essentials, keeping in mind that our products and work will also contribute to creating a pleasant environment. As a member of the wider community, Lotte Engineering & Machinery will do its best to create a better future for humankind.

 As a human-centered business, Lotte Engineering & Machinery is engaged in the production of hi-tech products and carrying out construction/engineering projects in an environmentally friendly way.

Think Your Life

Under the corporate philosophy of Realization of Affluent Life in a Nature-Friendly Way, Lotte Engineering & Machinery values the environment and people's lives and strives to have their beautiful dreams come true. As a leading business specializing in environmental engineering, we aim to create new corporate values and to cooperate with our customers in ensuring that their dreams of living in a clean and healthy environment come true.

We regard it as our duty to build a clean and healthy environment where people can lead a happy life.

Lotte Engineering and Machinery MFG. CO. LTD. has been ambitiously established as the 1st Korean anti-pollution installation constructor in 1973. Since then, Lotte Eng.& Mach. has placed milestones for creating beautiful environment and enriched human lives through and overcoming periodic and technical hardships.

Even at the early period of Korean industrialization when our society was at lack of concern in protecting environment, Lotte Eng. And Mach. has acknowledged our social responsibility and practiced our business principle to respect human dignity through harmonious and prosperous lives with nature.

Today, each and every member of Lotte Eng. & Mach. continuously pour their zeal and passion to introducing new products with research and development of advanced technology to create more beautiful and healthier future for our customers.

For determinedly introducing advanced technology abroad, extending its technology to adopt and modify into our circumstance and needs, measuring all aspects for safety for our customers and nation, and standing at the lead in the field to pour our zeal to practice true creative minds and ideas of human respect, we are proud to lay founds for prosperous future in the field of environment and construction business, industrial mechanical business, and heating and cooling machinery business.

Here and now, we would like to introduce our new aspects of our dream, idea, passion, and zeal to not only our customers but also to all our related partners.

Closing my letter, I would like to express many thanks to those who encourage and love us to keep the lead in the field. To recompense for your endless support, we promise to develop and supply the best products with firm readiness and creativeness.

Sincerely,
C.E.O. CYNN, YOUNG-JAE

A view of Lotte Engineering & Machinery's factory in Incheon.

Our Pride.....

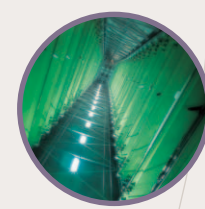

A leader in the environmental industry of Korea, Lotte Engineering & Machinery MFG. Co., Ltd. is committed to continuing to explore new areas in the industry.

.....History

1970~90 Forceful Start and bounce

- Nov. 1973. Founded Company
- Jan. 1974. Completed the factory in Incheon, Kyung-gi Province
- Feb. 1977. Acquired authorization for installing the Agricultural Sewage treatment plant (No. 25)
- Jul. 1978. Registered business for Depollution Installation Specialty(No.1)
- Oct. 1979. Acquired the business license for Civil engineering (No. 799 The Ministry of Construction)
- Jan. 1982. Launched Gas Equipment Business
- Apr. 1984. Changed the company title to Lotte Engineering & Machinery MFG Co., Ltd.
- Aug. 1985. Produced and launched first gas boiler and distribution in domestic market
- Mar. 1987. Acquired K.S.(Korea Standard) for the Gas Combi Boilers fueled by LPG
- Oct. 1988. Acquired K.S.(Korea Standard) for the Gas Combi Boilers fueled by LNG
- Jun. 1989. Executed technical license agreement with Kurimoto Co., Ltd.,

1990 Growing and Development to a superior company

- Jan. 1990. Executed technical license agreement with W.A.P C. Co., Ltd for Desulfurization and EP system
- Jul. 1990. Executed technical license agreement with SAUNER DUVAL, France
- Jan. 1993. Started automatic vending machine and distribution
- Mar. 1994. Won the best constructor prize of the year (Korea National Housing Corporation)
- Aug. 1995. Acquired a certificate of ISO9001 in gas boiler (KMA-QA)
- Mar. 1996. Won the best constructor prize of the year (Korea National Housing Corporation)
- Nov. 1997. Developed High efficiency automatic vending machine
- Dec. 1997. Acquired Industrial plant construction license (No.97-65: Ministry of Construction)
- Jun. 1998. Acquired a certificate of ISO9001 in Construction
- Dec. 1998. Won the best constructor prize of the year (Korea National Housing Corporation)
- Dec. 1999. Signed the contract for Technology Transfer of LU System (multiple rotary tower parking facility) in Taiwan

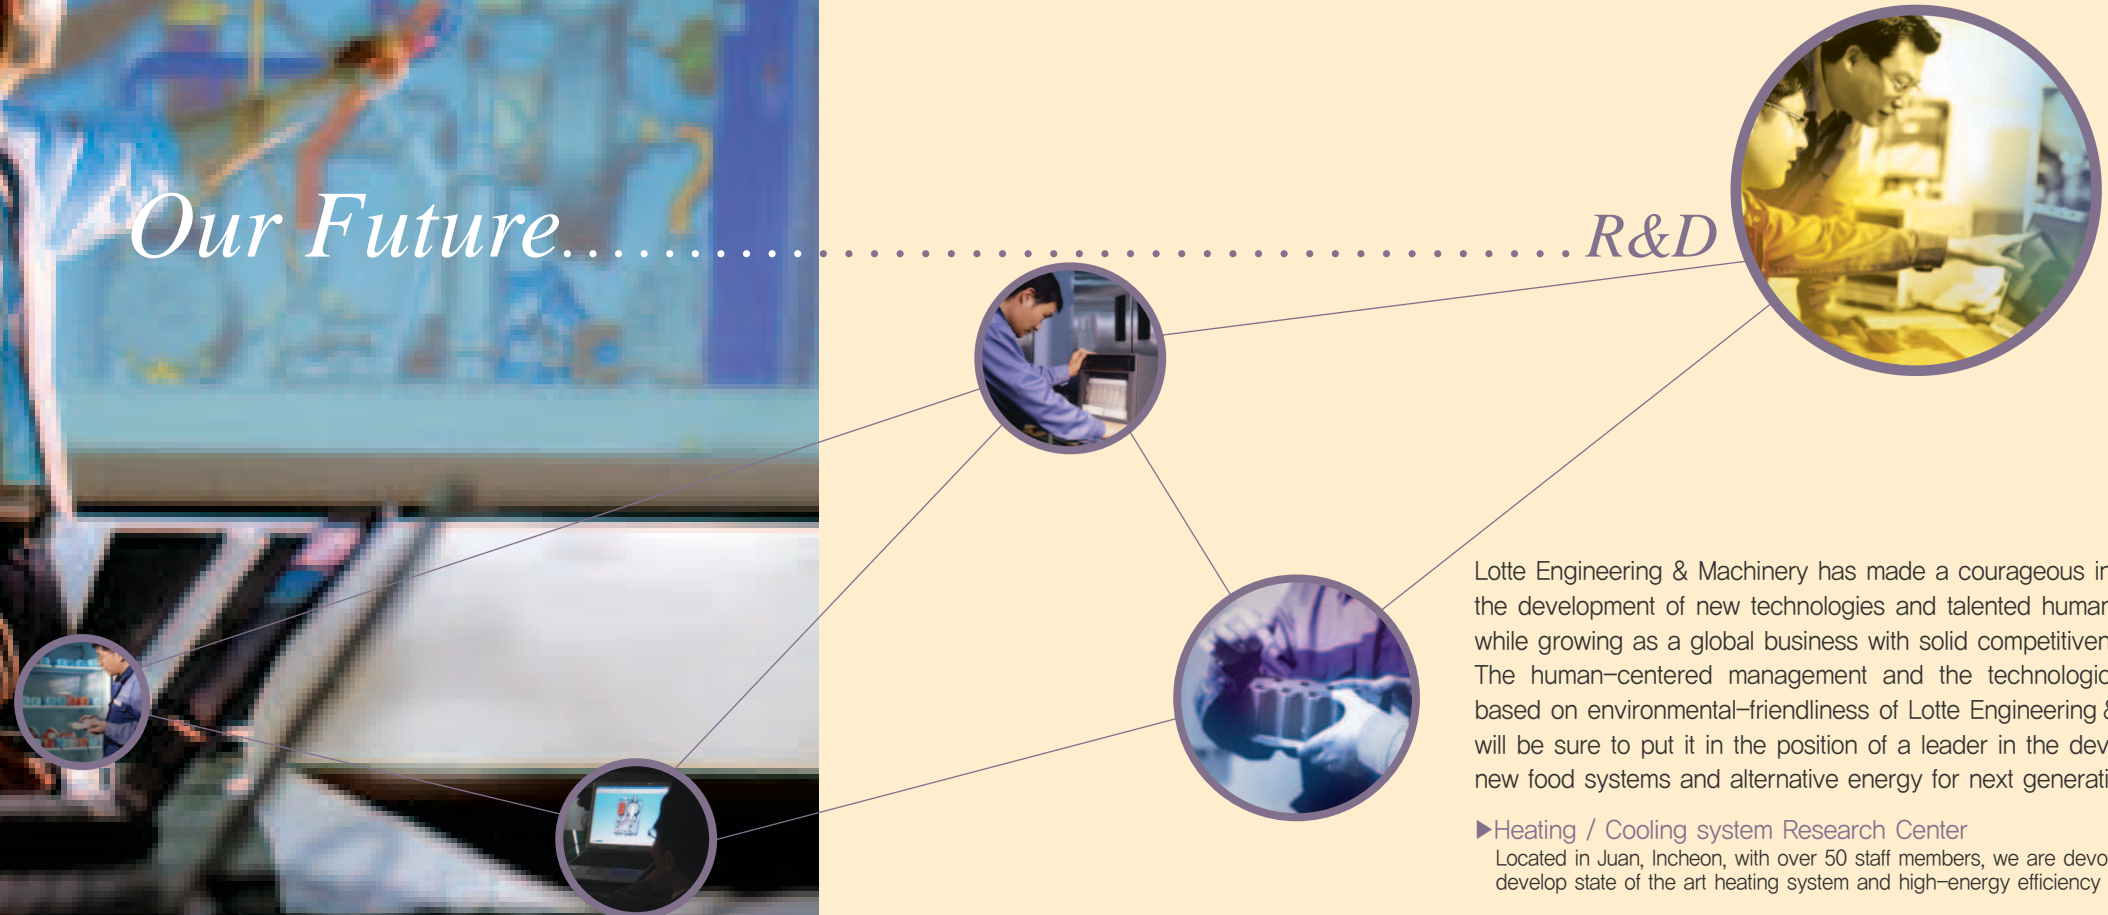

2000 Technology Innovation & Advancement for the future

- Mar. 2000. Signed the contract for Open showcase distribution for super store with LINDE, Germany
- Nov. 2000. Certified for high-energy efficiency facilities for Lotte Gas boiler
- May. 2001. Won the grand prize of Korea Customer Service (Korea Standard Ass.)
- Aug. 2001. Certified 1st class energy efficiency for the entire gas boiler models
- Nov. 2001. Sold over 1million gas boilers
- Mar. 2002. Won the grand prize for quality product in Korea Gas Industry (Korea Gas Journal)
- Dec. 2002. Signed sales contract with SANYO, Japan for GHP distribution in Korea
- Oct. 2003. Won the grand prize of Innovative Production in large company (Korea Management Association)
- Apr. 2004. Achieved 1million hours of free disaster in Construction industry (Industrial safety Management Corporation)
- Mar. 2007. Third Place Industry Prize on the Day of Industry & Commerce
- May. 2007. Grand Prize of Korea Services for four consecutive years (Korea Standards Association)

Our Future.....

R&D

Lotte Engineering & Machinery has made a courageous investment in the development of new technologies and talented human resources, while growing as a global business with solid competitiveness. The human-centered management and the technological prowess based on environmental-friendliness of Lotte Engineering & Machinery will be sure to put it in the position of a leader in the development of new food systems and alternative energy for next generation.

- ▶ **Heating / Cooling system Research Center**
 Located in Juan, Incheon, with over 50 staff members, we are devoted to develop state of the art heating system and high-energy efficiency devices.
- ▶ **Construction, Environment Research Center**
 Located in Seoul head office, the Construction and Environment Research Center is making every effort to make a better environment by providing systems such as the futuristic apartment housing, ecological pollution free facilities, etc.

Energy	Food System	Environment	Residential Spaces
<ul style="list-style-type: none"> • ESCO facilities • alternative energy • refrigeration and heating systems 	<ul style="list-style-type: none"> • Commercial kitchen facilities • Commercial/mobile refrigeration systems, refrigeration devices (with the exclusion of S/Cs at retail stores) • electric cooking equipment 	<ul style="list-style-type: none"> • Environment-related EMC (engineering/maintenance/consulting) • resource recycling • environment rehabilitation and re-creation 	<ul style="list-style-type: none"> • Remodeling • maintenance and operation of buildings, including apartments • non-residential buildings

* *Think The Best...* **Hi-Q**

It is our sincere wish to see people live in friendly neighborhood and in a clean environment. Lotte Engineering & Machinery helps you lead a happy life full of smiles in expectation of a bright future.

Food system / Commercial Appliance Division

Parking system Division

The First...product The first gas boiler in Korea

Warmth and comfort. These will be the words everyone keeps inside their hearts as a sweet hometown memory. Lotte Engineering& Machinery MFG has been leading in the heating culture with warmth and comfort just like Korea's hospitality. Since we are the first who introduced the Gas boiler in Korea in 1985, with superior gas efficiency, perfect safety, and prior quality durability. We have obtained our fame not only in the domestic market but also overseas. Moreover, with the construction of PSMS (innovative management system), and implementation of leading quality control system, we are securing our position as a leading company in the Gas boiler industry in Korea.

Gas Boiler Division

With the motto to serve society through customer satisfaction, we build gas boilers not only with technology but with craftsmanship. We won numerous prizes and certificates for our products; Korea first KS Acquisition products, certified ISO 9001, Certified for high-energy efficiency to all of our product lines.

Low gas cost

It reduces heating cost by applying proportional control the first in Korea.

Perfect customer service

Nationwide Toll free number (1588-8888) Fastest After-Sales Service.

Various models with a large selection 49.6sq m²~ 231.4sq m².

Automatic test-driving function, the first in Korea functioning test is available without gas.

Standardizing all models, the first in Korea

By standardizing the smallest models, we applied easy installation concepts.

Quality Control

- > PSMS
- > Continuing increment of R & D investment
- > Quality control system that is based on fundamentals

Achievements

- > Won grand Prize of Korea customer Services in boiler industry (4 year consecutive)
- > Won grand Prize of Korea's most innovative production plants
- > Certified for high energy efficiency in all production lines/ Nominated as the hit products of the year by several newspapers
- > Acquired KS TOP 10
- > Acquired Best After-Sales Service Company, etc

The First...product

A boiler that makes even your heart warm

Hi-Q CONDENSING 10⁺

GAS BOILER

The first in Korea / Condensing boiler that applies stainless to all Latent heat and Sensible heat exchanger

- Guaranteed the highest performance by joint development with Giannoni the leading European boiler heat exchanger manufacturer
- Increased its durability up to 100% by applying stainless heat exchanger
- Adopted remote control system for the first time in Korea
- Save energy by up to 30%
- Luxurious looking boiler matching with the elegant interior
- Environment friendly boiler that increased combustion capacity and heat efficiency
- Rapid heating and using warm water in 18 seconds

Hi-Q

GAS BOILER

State of the art gas boiler with economical, pleasant, and easy system

- Elegant and luxurious design
- Saves gas consumption with turndown ratio control
- 54 safety devices • Adopted 24 hours rotary timer
- The lowest noise (44dB) and vibration in the industry
- Adopted remote control system for the first time in Korea
- Allowed parallel circuit remote control
- Applied power failure replacement function
- Heating water, room temperature control function
- Max.72-hour emergency heating function

The Best...product No other heating system can beat the System in terms of heating efficiency

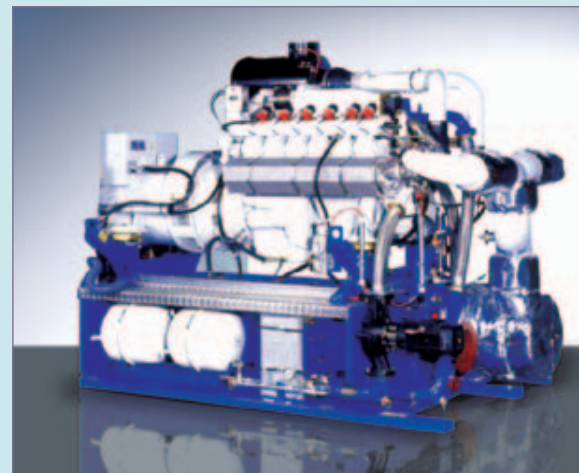

Ventilation Cleaning system

With growing concern for well-being culture that pursues a healthy lifestyle and as part of an energy saving plan, sealed and heat proof buildings are rapidly increasing. Thus, Building Ventilation system is being switched from natural ventilation to manual ventilation system. Ventilation Cleaning system, the state of the art energy saving system which is produced by Lotte Engineering & Machinery MFG. will let you become free from sick house syndroms while providing a clean air system 24/7 days and a clean room environment.

APT Cogeneration System

This method is applied by utilizing waste heat for heating which is generated by gas engine powered generator for electricity. Through this high-energy efficient system, up to 30% of gas expenses can be reduced comparing to current heating methods.

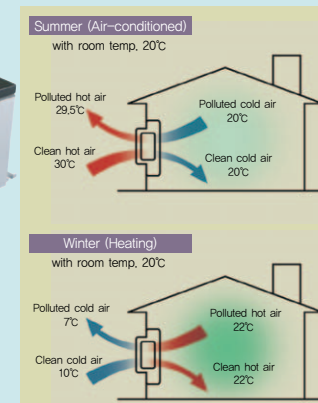

Installation of Individual Heating Conversion

Remove the old central boiler and heat exchanger and install adequate capacity boiler to each residence through which room heating and warm water can be supplied to the individual resident for 24 hours.

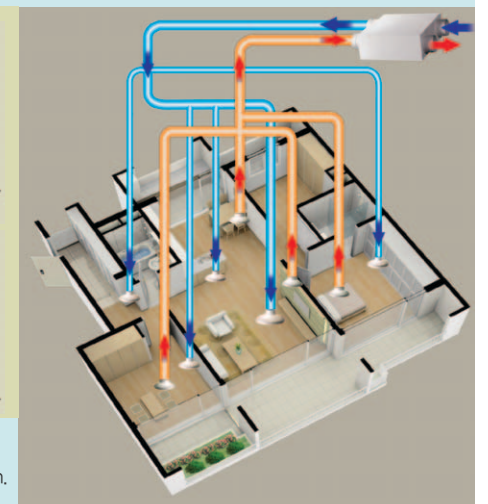

Blue Path HRV(heat recovery ventilator) System

- Realizing pleasant living condition
- Removing Formaldehyde (HCHO), the core noxious materials in new house symptom and volatile organic compound (TVOCs)
- Air cleaning function
- Energy saving function
- Fungi, bacteria control and removal

▶ The system that discharges Polluted air while letting Clean air inside and recollects heat for the best condition.

The Best...product To lead a happy and affluent life

A natural touch to itself, Lotte Engineering & Machinery MFG. provides a richer and fresher life. With technology that always thinks environment and living, you will meet every aspect of your lifestyle from vending machines to various types of showcases.

Vending machine

Unmanned customer satisfaction system that provides an easy and enjoyable life.

Glass Door Refrigerator & Freezer

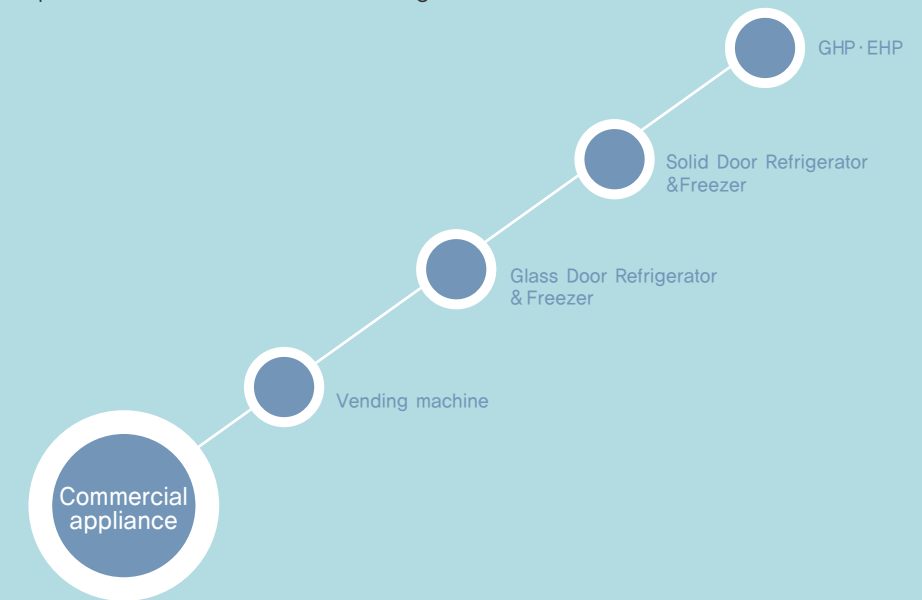

Best cooling & freezing system solution that builds a safe food chain foundation

Solid Door Refrigerator & Freezer

High-level digital kitchen appliance that gives a full natural touch

GHP·EHP

State of the Art fueled Heating & Cooling supply systems that provides a pleasant environment while saving maintenance cost.

The Best...product The product of fresh and warm technology!

LOFOS

SYSTEM SHOWCASE

This energy-saving, environmentally-friendly system offers excellent durability and has been precisely customized to suit the needs of our customers.

- The system showcases: Showcase facilities for department stores, discount stores and medium-to-large supermarkets.
- Showcases for convenience stores: Open showcases, walk-in showcases and reach-in showcases.
- Freezers and refrigerators for high-end stores, cold tables and storage rooms.

COEN

Conservation of Environment & Energy

This product is a powerful, state-of-the-art system boasting a simple design and cutting-edge technology. Energy conservation and environmental problems were taken into consideration during the design process.

- GHP: For Gas Engine fueled cooling, heating
- EHP: For Electric Engine fueled cooling, heating

The Best...product

Our products put customers' convenience first

The hot and cold beverage vending machines manufactured by Lott Engineering and Machinery continue to evolve on the basis of intricate research into the desires of the delicate human palate. The advanced dimensions of our technology have made possible regular coffee with chewable ice. The heightened elegance of our design offers the luxuriousness of an exclusive cafe.

- Vending machines: High-quality regular coffee vending machines, canned beverage vending machines, PET bottle vending machines, and multi-function composite vending machines.

The Advanced... An easy-to-use hi-tech parking system

Reasonable cost and Effective space control are the utmost factors for our parking system. With our parking system, sufficient and agreeable parking choices will be realized. Machine parking system that highlights its various applications with the finest technology and semi permanent steel skeleton parking system with reasonable maintenance cost – Lotte Engineering & Machinery MFG. is proudly presenting fun city parking.

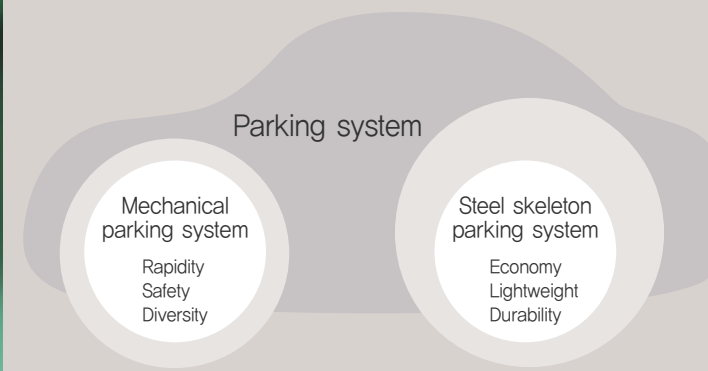

Mechanical Parking System

With various types, it optimizes space both underground and on-ground. It guarantees easy operation with rapid in and out by securing the maximum storage in a limited space.

- LV System/LU System/LMT System/LST System/
- LCP System/LP System/LMG System/CAR Elevator

Steel Skeleton Parking System

It allows various types of installation based on the land type; it requires a short installation term, easy to dismantlement, economical, and is lightweight

The Advanced... An optimal system suited to various dimensions

• LMT-SYSTEM

- LV-SYSTEM : Applied for large buildings, independant steel structure type/Built-in type
-Installation site: Sejong Hotel, Hongik hospital, Anyang CGV, Chunjoo Lotte Shopping center, Pusan Haeundae Acroviev, etc.
- LU-SYSTEM : Applied for large buildings, underground site
-Installation site: Lotte Shopping center, Daerim rysion, Euijuro complex building, Daewoo I-vill at Gaesan-dong, Incheon, etc.
- LMT-SYSTEM : Applied for underground in building, park, road/
applicable to attachment to park a large capacity
-Installation site: Elise building in Anyang, Mesa Shopping Mall in Namdaemun, Kangnam Sungshim Medical Center at Daerim-dong, Daerim AcroVill at Mok-dong, etc.
- Steel Skeleton parking System : Various types of installation methods /
Composed of economical structure
-Installation site: Hanyang University, Kwangrim Church, Gasan-Dong Distribution Center, Anyang Hospital, etc.

Environment Division

Construction Division

* *Think Perfect...* **INVENS**

Lotte Engineering & Machinery leads others in the effort to make the nation a cleaner and more pleasant place to live in.

The Fresh... Accumulated technological prowess in making pleasant environments

Since 1973, Lotte Engineering & Machinery MFG Co., Ltd. was the first company in Korea that acknowledged the importance of the environment. We initiated our mission to pass down clean water and air, and beautiful mountains and rivers. Lotte Engineering & Machinery MFG Co., Ltd. which has the finest know-how, experiences and advanced technology can guarantee your satisfaction under any circumstances.

Water treatment Division

We work to preserve our water resource – we supply well-treated water by utilizing advanced technology
–sewage, wastewater, livestock wastewater, Night-Soil, filtration, advanced drinking water treatment, Demi. water, river purification and ecology recovery, drainage pumping plant etc.

Air Pollution and Waste Division

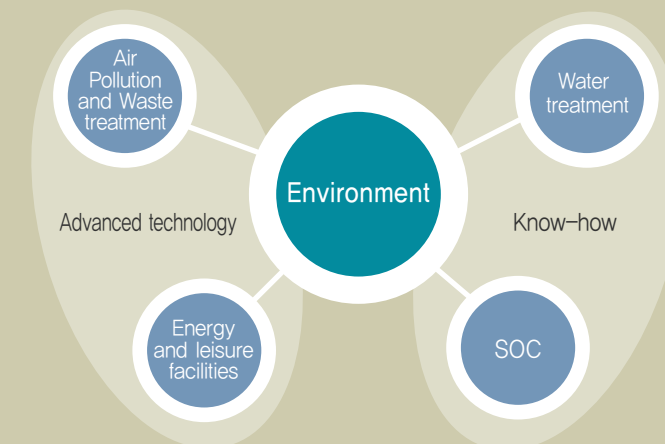

Technology that thinks about clean air and blue sky. We are working toward advancement in R&D and technology accumulation for prevention of pollution and preservation of clean air.
–incineration & landfill facility, dust collecting system, DeNOx and deodorization facility, desulfurizing facility and soil recovery, etc.

SOC Division

With the experience of environmental facilities in domestic and overseas, we are making our best efforts to supply Environment plants with advanced technology.

Energy Division

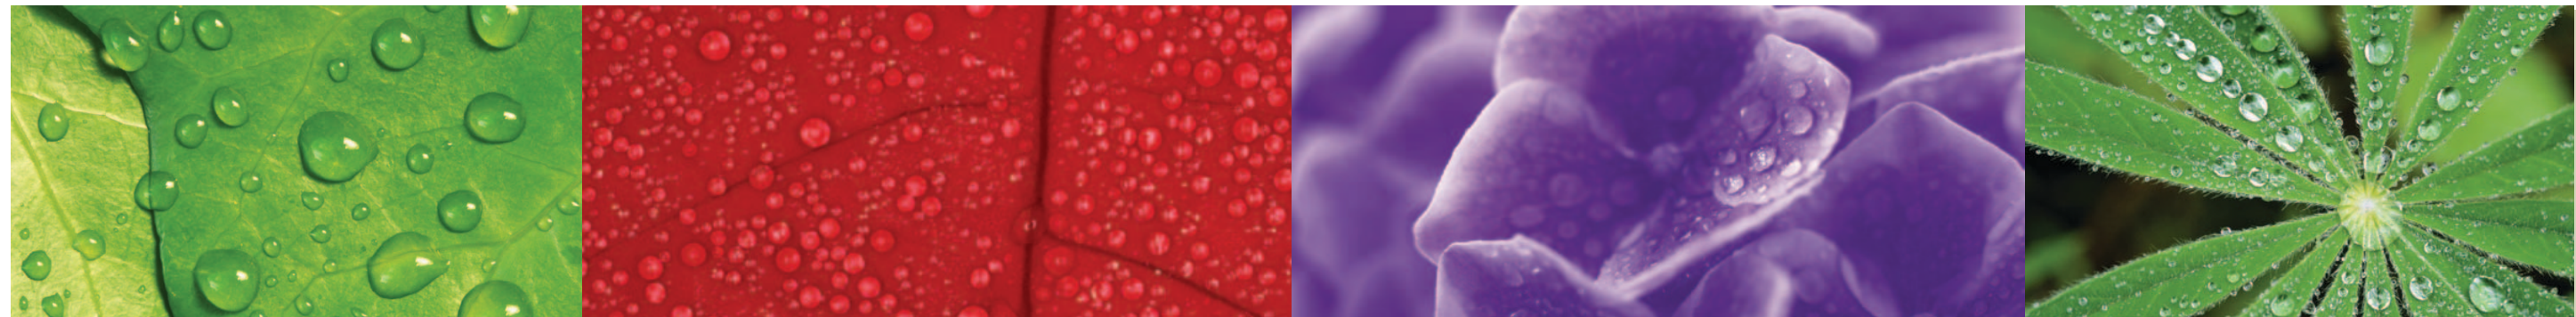

By saving foreign currency and maintenance costs with effective energy use, we can achieve optimum results in energy efficiency and pollution reduction. We provide the cleanest working and living condition.
–Co-generation power plant, Wind force, Solar Power, Bio gas, RDF, etc.

The Clean...

Leads efforts to create a cleaner and healthier living environment

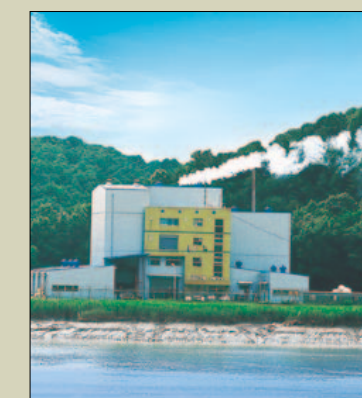

Water Treatment / Plant

- Sewage Treatment Plant : Seoul, Daegu, Chooncheon, Seoguipo, Thai(Bangkok), etc.
- Water purification facilities: Honam Petrochemical, KEPCO.
- Waste water Treatment Plant : POSCO Yeochun industrial complex, Daejun 3,4 industrial complex, etc.
- Advanced drinking water : Pusan, etc.
- Night-soil Treatment Plant : Pusan, Incheon, Daegu, Euijungbu, etc.

Air, Waste Treatment

- Incineration : Sachon, Kanghwa, POSCO
- Food waste Treatment : Yusung-gu, Daejeon, etc.
- SOC : Bosung, Pohang sewage treatment plant, etc.
- Entrusted management : Yongin, Eumsung, Sacheon, Hongsung, etc.
- Electrostatic precipitator : Youngphoong, Youngdong power plant, Lotte World, etc.
- DeNOx and deodorization : Lotte World, Lotte Confectionery, etc.
- Co-generation power plant : Jinju, etc.
- Leisure facilities: for Seongju Golf Course, etc

The Humanism...

Creates an environment where people interact with nature in a friendly way

The leader of future Construction is based on decades of hands on experience and technology. By exerting our every effort in supplying high quality comfortable apartments, we are building a new standard for Korean living culture. Based on our construction philosophy that pursues functionality and natural sense. From the living space that becomes a richer and more comfortable life to digital space that meets the requirements of digital age, we will do our best to satisfy our customer's need.

Apartment

Living culture focusing on humans that are coherent with an amicable environment. We are realizing the ideal living standards for the 21st century through Lotte Invens

Building

With the finest exterior and structure, this perfect building is changing the city landmark.

Civil Engineering Work

With vast experiences and outstanding construction ability, Lotte Engineering & Machinery MFG Co., Ltd. has been contributing to expanding national infrastructure such as roads and bridges.

LOTTE INVENS

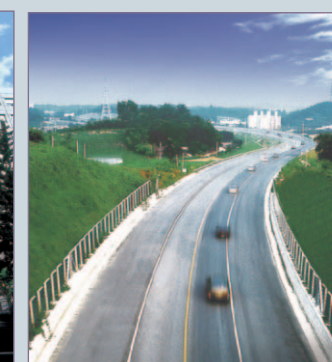

The Masterpiece... We create spaces where people can live happily with environmental-friendly designs

The name of Elegance, Dignity, and Honor – LOTTE INVENS

The term INVENS means the plural form of invention and invention. In LOTTE INVENS, we try our best to build state of the art residential areas that leads to a new living culture and standard by recognizing apartments as an art form.

High-class Interior Design

Housing Sector

- Lotte Apartment Complexes at Mt. Ujang in Seoul
- Lotte Invens Apartment at Bundeongno and Ulsan Grand Park, Ulsan
- Lotte Invens Woodpark Apartment in Chuncheon
- Lotte Invens Apartment in Milyang
- Lotte Invenca, Suncheon
- Lotte Invens Apartment in Geoje Island
- Lotte Invens Apartment in Gunsan
- Lotte Invenca, Andong

Architectural Engineering Sector

- Lotte Invens Apartment in Pyeongtaek
- Lotte Gallerium in Yangjeong-dong, Busan
- Joongang Tower in Sanbon
- Yuseong Combi Bldg. in Incheon
- Lotte Gallerium Centum in Haeundae, Busan
- The Hyosung Bldg. in Yeouido, Seoul
- The Hyehwa Girls' High School building
- Busan Centum City Condominium

Civil Engineering Sector

- The Dangjin - Sinpyeong Highway Expansion and Paving Project
- The Seosan - Jigok Highway Expansion and Paving Project

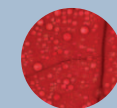

Think.....

Happiness

The customers' ultimate satisfaction is what Lotte Engineering & Machinery seeks. As a result of putting extraordinary emphasis on follow-up service, Lotte Engineering & Machinery was selected as an exemplary business in after-sales service. People working with Lotte Engineering & Machinery find both its product quality and the level of follow-up service to be the best.

C.S

Technical Cooperation

Group

Approved the Best After-Sales Service Company

We were named as the best after sales service company for consumer products from Korean Agency for Technology and Standards at The Ministry of Commerce, Industry and Energy while obtaining certification for all of our product lines from gas boiler, home gas burner, vending machine, showcase, etc.

2003 The Best Plant in Productivity Innovation(A Largecorporation)

By importing innovative internal production control system, we realized customer satisfaction such as scheduled multiple production in a short period of time along with achievement in reduction of material portion to products costs, Zero inventory, Zero defect goals, etc.

1 million hours zero Disaster in Construction Division

Duckcheon Construction site at Pusan won the prize from Korea Occupational Safety and Health Agency as we were acknowledged for our effort to train computer simulation for disaster prevention to our workers and also renovating the working environment.

Received the Korea Service Awards in 2004 and 2005

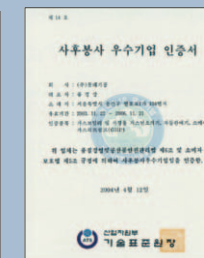

We won the grand prize in home gas boiler parts by setting quality management systems that focused on customer satisfaction 24/7 days after sales service and service reservation programs.

Third Place Industry Prize on the 34th anniversary of the Day of Industry & Commerce.

Third Place Industry Prize for the company's contribution to the progress of industries in Korea through the localization of water-treatment facilities and plant facilities in environment businesses, and consistent technology development in manufacturing industries.

▶ Medal of Excellent Construction

▶ Certificate of Excellence in After-Sales Service

▶ Grand Prize for Productivity Innovation of Korea

▶ Certificate of Record of No Industrial Injury One Term

▶ Grand Prize for Service of Korea

▶ Industrial Service Merit Bronze Tower

Think.....

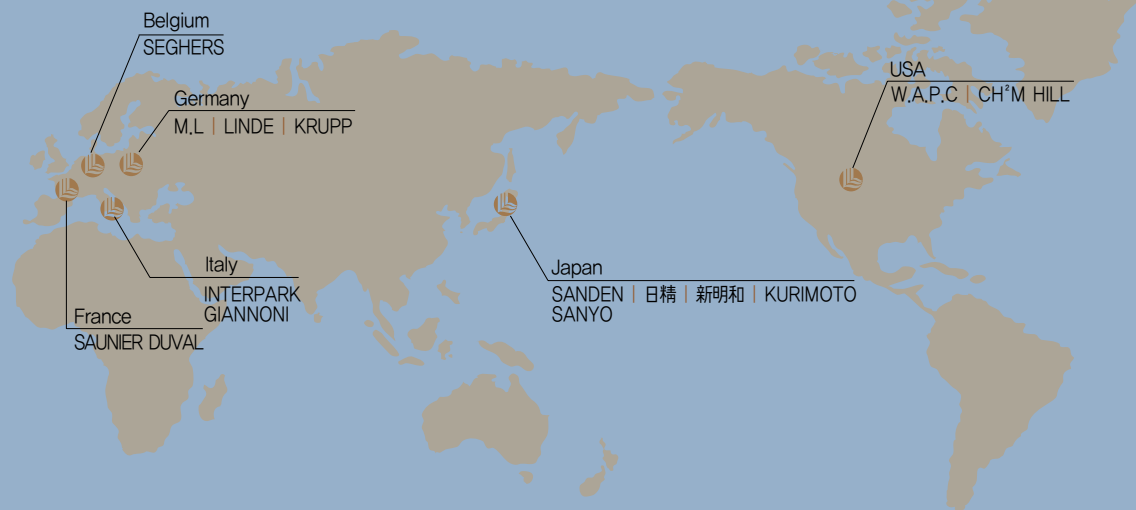

Value Creator

Lotte Engineering & Machinery regards human-centered management as the right way to carry out business. Thus, it focuses on developing environmental-friendly technologies. At Lotte Engineering & Machinery, we are committed to continuing to grow as a first-rate business, distinct from others in having such sophisticated technologies.

Technology Cooperation

As we established from our mindset to become a pollution free environment specialty company, we have been nurturing technology cooperation from abroad for over 30 years in order to promote our technology and know-how through which we could realize productivity innovation and quality improvement as a leading company in the industry. Most of all, We are giving our total contribution to secure better technology and to get the upper hand over others without limiting the regional and country origins. We will do our very best to invite a better and richer future.
